

QUICK BRIEF 2020

20 January 2020

Sibanye-Stillwater is included in the prestigious CDP climate change A List for 2019

CDP is the foremost global standard for measurement and reporting of climate change information and; is the largest repository of corporate greenhouse gas emission information. CDP aims to incentivize and guide investors, companies and cities on a journey, through disclosure, towards becoming leaders in environmental transparency and action. In 2019, over 8,400 companies and 920 cities, states and regions participated in the CDP disclosure programmes, a 20% increase on the previous year.

The National Business Initiative (NBI) would like to congratulate **Sibanye-Stillwater**, the top local corporate among the 179 companies that made this year's prestigious **A list** for climate change transparency and action. The A list comprises the top 2% of corporates participating in the CDP and represent the world's most pioneering companies trailblazing the way to a truly sustainable economy. The A List companies from other parts of the world include AstraZeneca, BT Group, CVS Health, Danone, H&M, Klabin, the LEGO Group, L'Oréal, Microsoft, Nestle, Ørsted, Sainsburys, Samsung Engineering, Sony, Unilever and Walmart.

Neal Froneman, Chief Executive Officer of Sibanye Stillwater commented: *"We are pleased to be recognised for our commitment to, and disclosure on climate change. The recognition from CDP comes at a crucial time where the impacts of ESG are becoming more pronounced. As the largest primary producer of Platinum Group Metals (PGMs), the metals of which are used in the production of catalytic converters in automobiles to remove noxious gasses from exhaust fumes, Sibanye-Stillwater is committed to expanding its role in providing a cleaner and sustainable environment and improving lives. Consistent with our renewed strategic focus on ESG, we continue to look at how we can improve our performance, not only on the environmental front, but across various ESG disciplines."*

In 2019, over 525 investors with US\$96 trillion in assets and 125 major purchasers with US\$3.6 trillion in procurement spend requested companies to disclose through CDP. Reporting companies now represent over 50% of global market capitalization. Companies on the climate A List outperform their peers on the stock market by 5.5% per annum according to STOXX Limited, a Swiss globally integrated index provider, covering global markets across all asset classes.

We would also like to congratulate the local companies that attained an A- climate change score for their noteworthy demonstration of best practices. These companies include Pick n Pay Stores Ltd, Mondi Limited, FirstRand Limited and Clicks Group Ltd, all NBI members.

The NBI, a local partner to the CDP since 2007, continues to help companies integrate climate change into their overall strategy and governance structures. We look forward to the inclusion of more South African companies on the A list, joining the ranks of business leaders globally accelerating the zero-carbon transition.

The 2019 CDP climate change scores will be released today, January 20th, 2020 and are available on the [CDP website](#) and company dashboards. The 2019 forests and water security scores will be released on 3 February 2020.
