

TAMDEV: Updated Report

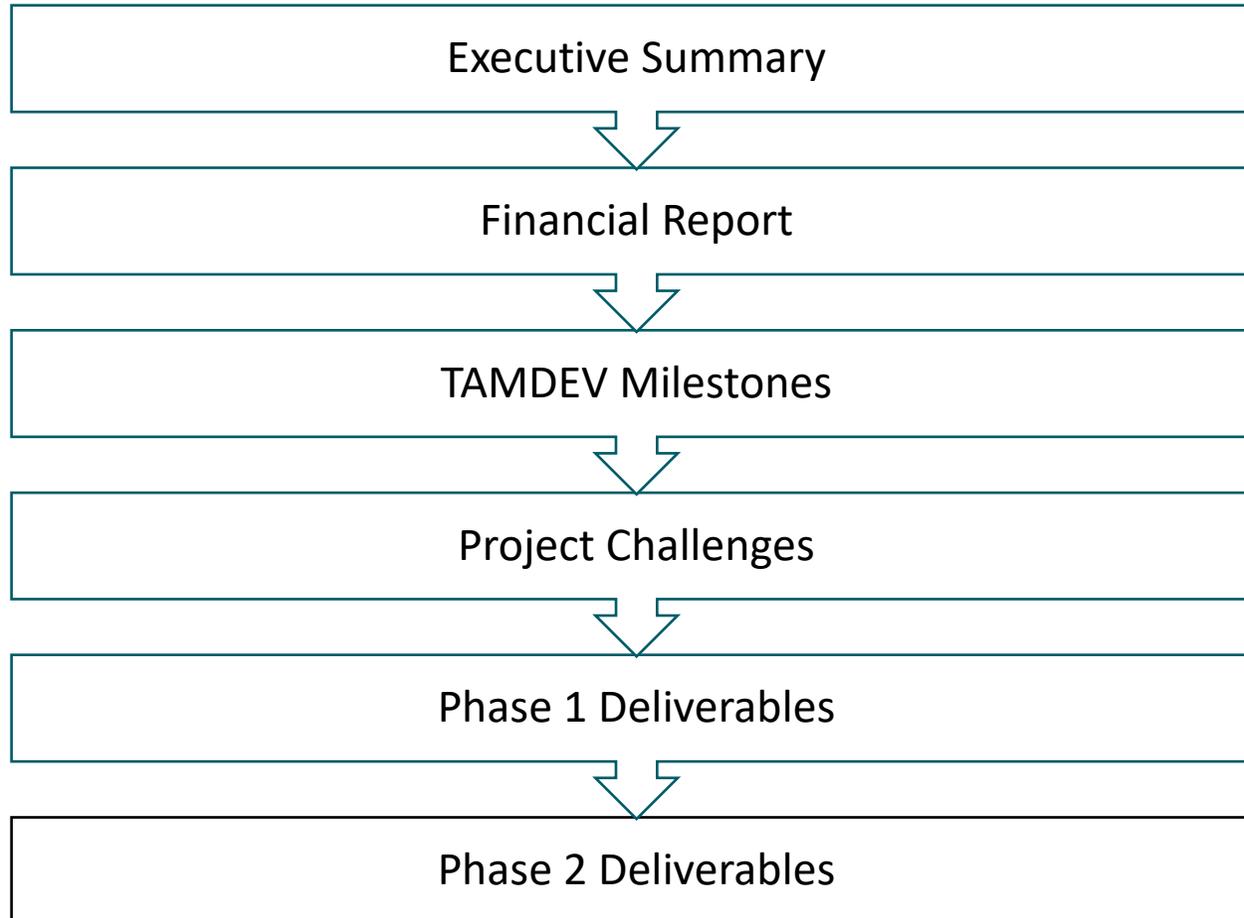

Technical Assistance, Mentorship, Development
(TAMDEV)

REPORT

for the period

1 July 2019 - 30 June 2020

Index

Executive Summary

Establishment of the TAMDEV Office

- ❑ On the 1st July 2019 ASISA employed the services of NBI to initiate the first phase of the TAMDEV Jobs Summit Deliverable.
- ❑ The NBI was identified as the institution through which business could provide a coordinated means of deploying retired technical expertise to strengthen the capacity of the state, with the aim of improving service delivery.
- ❑ ASISA allocated R4million over two years for the establishment of the TAMDEV office and the appointment of resources to execute on the agreed mandate. A Unit head, supported by an administrator has been appointed.

Executive Summary

The first phase of the TAMDEV programme focussed on the following strategic imperatives:

Creating
awareness and
support from the
private and
public sector

Demarcating the
scope and focus
areas of TAMDEV

Positioning of
the programme

Establishment of the
TAMDEV Office

Executive Summary

TAMDEV was able to identify the areas of focus and support early in the establishment phase.

All relevant parties highlighted the need to **strengthen the capacity of local government in:**

Water and Energy projects

Revenue management

Local economic development

The **challenges** encountered in the first phase:

Cumbersome decision-making processes of private & public sectors

Establishment of partnerships

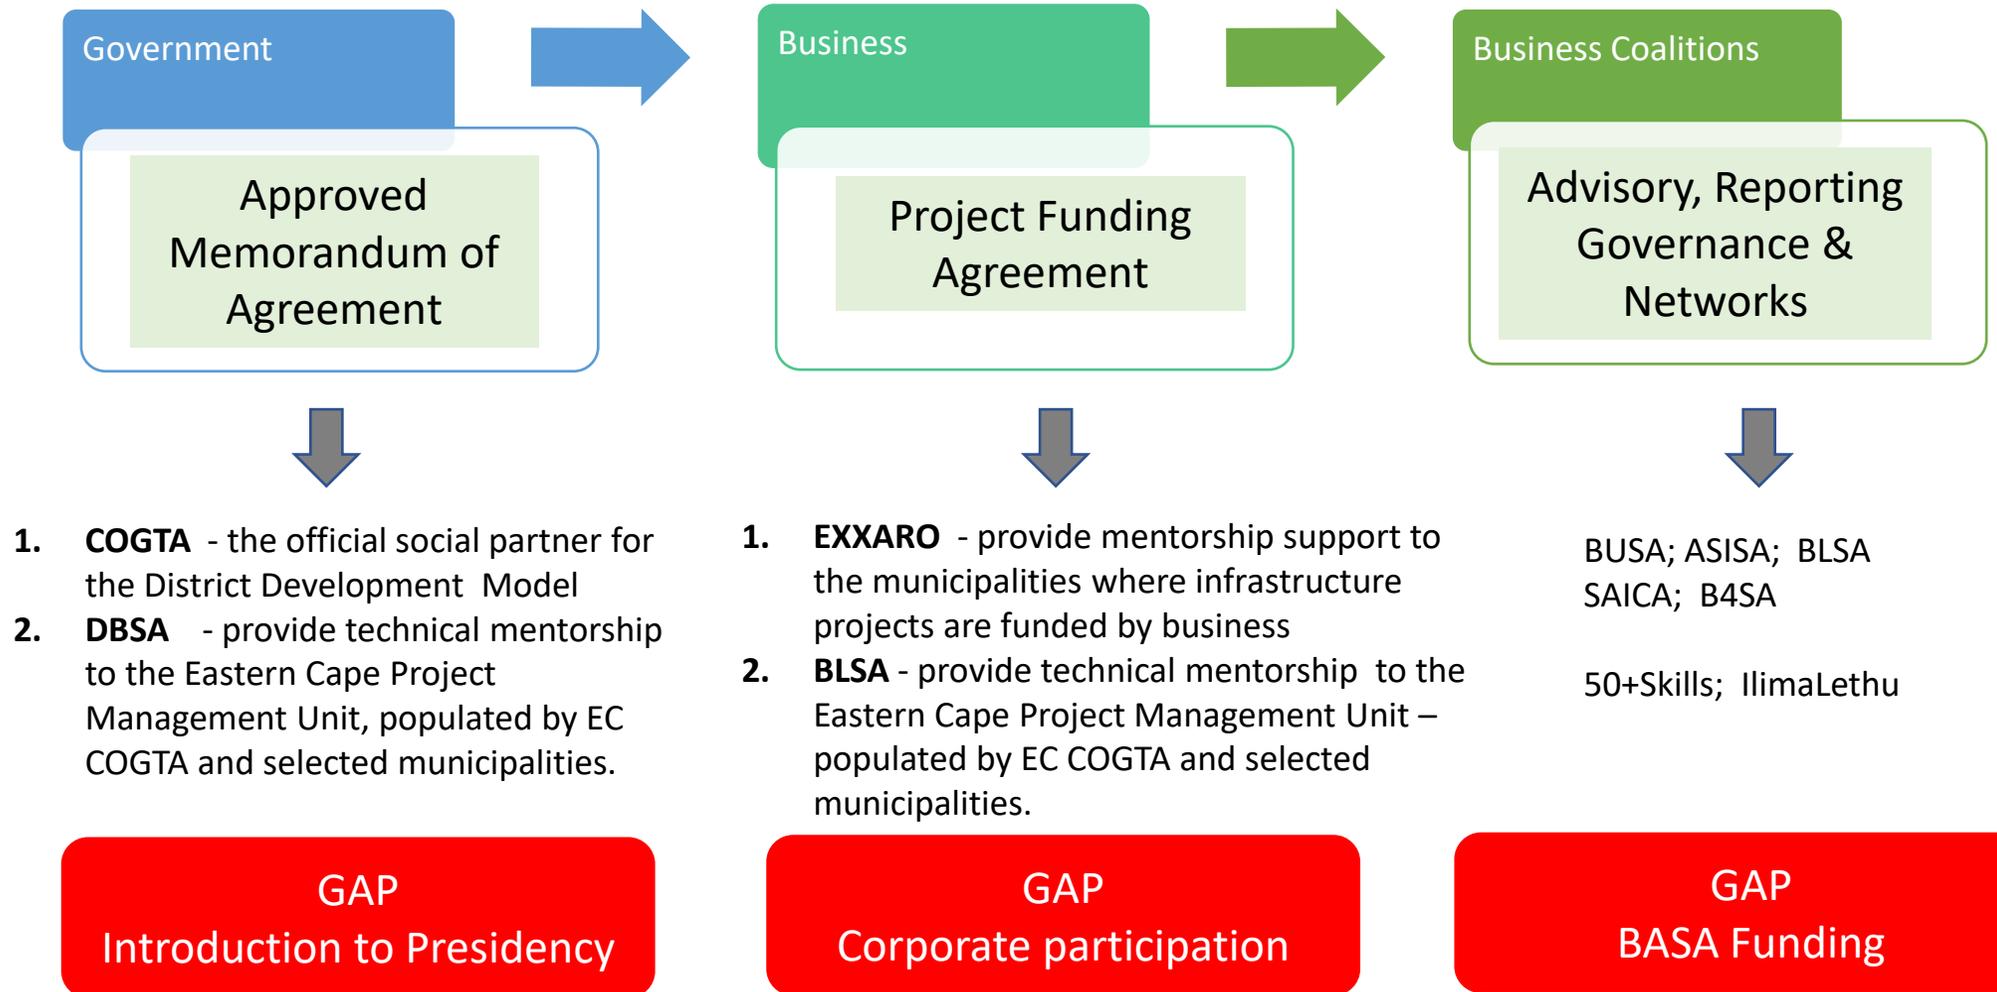

Availability of funding

Establishment of the TAMDEV Office

OBJECTIVES

2. Project Selection

Project Selection Criteria:

TAMDEV Milestones

PROGRAMME

OBJECTIVES

3.1 Pilot Project

(EC Project Management Unit)

Funding Agreement

- R2 Million Rand per annum (BLSA)

Project Objectives

- Deployment of 5 technical mentors to strengthen the capacity of the Project Management Unit (PMU) and 4 municipalities. DBSA has committed to fund/co-fund selected catalytic projects with the focus on water, energy, revenue management and township development for a period of 5 years.

Project Duration

- 5 years, subject to funding (TAMDEVs commitment will be reviewed on an annual basis)

Project Partners

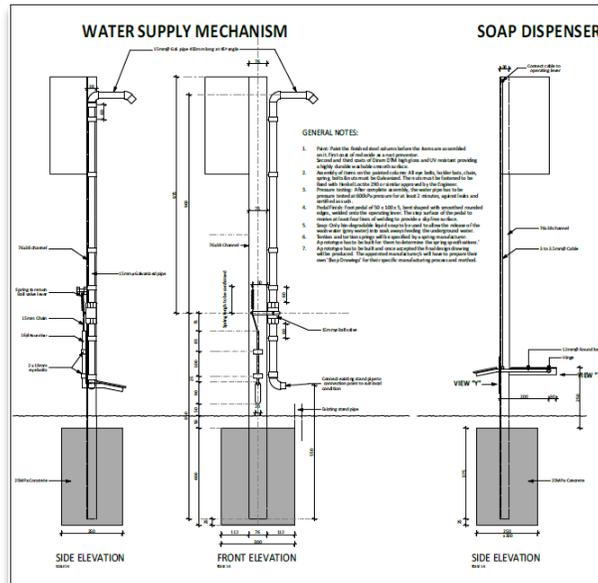

- EC COGTA, DBSA, Local Municipalities

TAMDEV Milestones

PROGRAMME OBJECTIVES

3.2 Pilot Project

Combined foot operated tap and handwash unit (designed and developed by TAMDEV engineer)

- Prototype developed
- Prototype tested in field with Ekurhuleni Municipality
- Revised model developed by water engineer with 40+ years of experience in South Africa
- Manufacturing capacity: 100 models per day
- Main areas of application: schools, clinics, taxi ranks, pension payout points, informal settlements
- Tamper proof system developed to prevent vandalism and theft
- Connects to raised water tank or municipal supply

TAMDEV Milestones

Technical Assistance offered during COVID-19: *Design and development of a foot-operating public handwashing facility*

Member of the Ekurhuleni Municipality Mayoral Committee, Ms Tiisetso Nketle examines how the initial unit works, April 2020.

The initial 50 foot-operating public handwashing units installed in Ekurhuleni on 10th June 2020

Provinces

Project Challenges

Project Risks

	Slow decision-making processes in both private and public sector	A minimum of 4 months is required for approval of a formal agreement. Project implementation after approvals takes an estimated 6 – 8 weeks due to slow planning and buy-in processes.
	Project resourcing	The appointment of mentors depends on the availability of funding for stipends and other costs related to the screening, matching, training, monitoring & evaluation and administrative support.
	Project funding	Co-funding of programme and/or project is hampered by regulatory framework of Government (PFMA & MFMA).
 Mentor location	Mentor Database	The use of local mentors in the areas where projects are implemented, resulted in some mentors excluded from active participation due to their location.
