NBI AND THE SUSTAINABLE DEVELOPMENT GOALS (SDGs) The NBI has developed a methodology to help companies and sectors prioritise the SDGs. This prioritisation is necessary to drive the strategic changes we need to transform our economies. We have piloted this methodology with the banking sector through BASA and with Sasol. We also conducted a weeklong roadshow, with our partner DI, introducing our methodology and thinking as well as tools to help companies understand how the SDGs can drive company competitiveness. 6 THINGS WE LEARNED ABOUT THE ENVIRONMENT AT DAVOS 2019 Even before Davos started, the scene was set for environmental issues to take centre stage. The Global Risks Report 2019 declared that humanity was 'sleepwalking its way to catastrophe' as extreme weather, failure to act on climate change, and natural disasters topped the list. The report also painted a worrying portrait of the deep interconnections between these environmental risks and the level of human health, economic growth, and security. [Jahda Swanborough, World Economic Forum, 25 January 2019.](#)

ROUNDTABLE: UNDERSTANDING THE GENDER PAY-GAP IN SOUTH AFRICA |Friday, 8 March 2019 | Sanlam, Sandton |The National Business Initiative (NBI) is hosting a roundtable discussion to unpack the gender pay-gap in South African workplaces. It is estimated that women in South Africa earn 23% less than men. The gender pay-gap reinforces inequality in the most unequal society in the world. Given that most South African households are headed by women, the pay-gap between men and women has far-reaching consequences. Companies can unlock higher levels of productivity, morale and retention by taking active steps to address the gender-pay gap. For NBI member companies only. Please RSVP [here.](#)

INTRODUCTION TO SUSTAINABLE DEVELOPMENT | 18 to 23 February 2019 |The Sustainability Institute, Stellenbosch, Western Cape |This course focuses on the rise to global prominence of the challenge of sustainability in general and sustainable development in particular. Public policy debates at the global levels of governance are increasingly focussing on the challenges posed by natural resource limits to the ways production and consumption are currently structured and managed within a world that is sharply divided between the rich (located mainly in the global North) and poor (located mainly in the global South). For more information or to apply please click [here](#).

COMPLEXITY THEORY & SYSTEMS THINKING | 4 to 9 March 2019 |The Sustainability Institute, Stellenbosch, Western Cape | The main aim of this course is to make it possible for participants to develop a general, albeit basic, understanding of complexity and complex systems. This understanding should not only be technical, but should help in the analysis of our complex world. Complexity theory has implications for our conceptions of knowledge, ethics and of course, sustainability. For more information or to apply please click [here](#).

CARBON FOOTPRINTING - FROM STRATEGY TO PRACTICAL TOOL | 13 to 16 March 2019 |The Sustainability Institute, Stellenbosch, Western Cape | Imagine being able to look at the environmental disclosure of a company and gaining insight about the company's strategy and pitfalls in the same sense that you would have gained when looking at the company's financial statements. This is indeed possible. While many of the top 100 companies listed on JSE Limited already calculate their carbon footprints, this is just the tip of the iceberg. Before long, every company will need to calculate its carbon footprint and also strive to reduce it. Soon carbon (and water) footprinting will be implemented and actioned by all listed companies.
