

Mapping the SDG Targets and NDP Objectives

The NDP & UN's Sustainable Development Goals have a similar purpose and timeline

The SDGs are government agreed international development goals where implementation by multi-stakeholder partnerships of government, labour, civil society and business is specifically intended

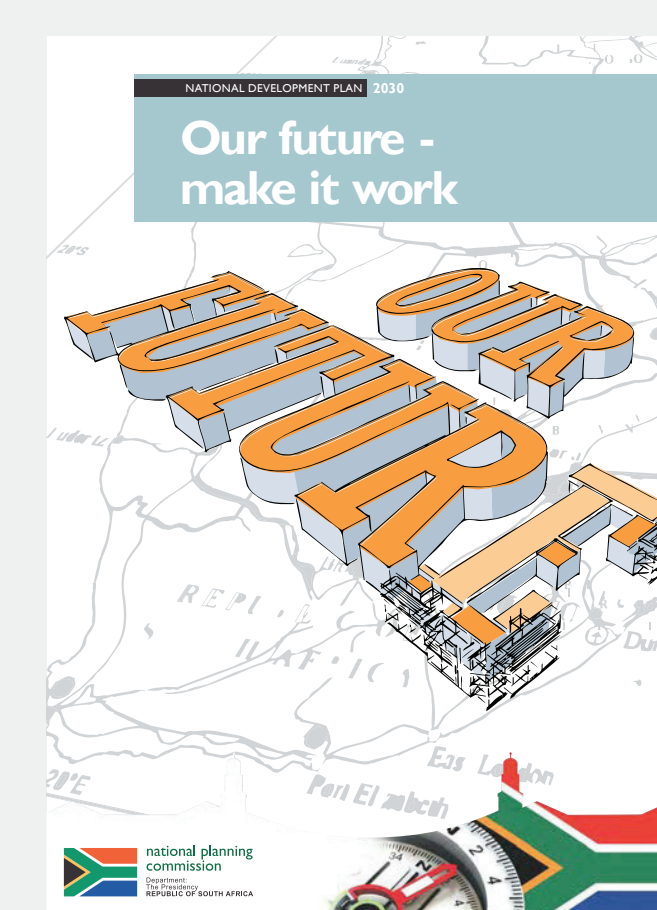

The National Development Plan provides a common focus for action across all sectors and sections of South African society.

- SDGs draw heavily on the Rio +20 outcomes: The Future we Want
- SDGs have 17 goals, each with a specific development theme
- Each goal has targets with specific timelines: there are 169 targets

- The NDP has 13 Chapters dealing with specific development themes
- Each chapter has objectives and actions, where objectives are goals often with specific timelines
- 92% of the 72 NDP objectives map to the 169 SDG targets

The SDG targets and NDP objectives align:
