NBI Members Only
Carbon Markets Africa Summit 2026

National Business Initiative

NEWSFLASH 28 SEPTEMBER 2026

The **National Business Initiative (NBI)** is pleased to be a Supporting Organisation of the **Carbon Markets Africa Summit (CMAS) 2026**, taking place from **13 to 15 October 2026** at the Kigali Convention Centre in **Kigali, Rwanda**.

Under the theme "Africa's Carbon Markets on the Global Stage: Delivering a Strong Pipeline of Projects, Capital and Transactions at Scale," CMAS 2026 brings together policymakers, investors, project developers, buyers and market infrastructure leaders to advance credible, high-integrity carbon markets across Africa.

Why this matters for NBI members

Africa's carbon market is at a pivotal point, with growing demand for high-integrity credits, increasing focus on compliance markets and a need to mobilise greater climate finance. CMAS is focused on moving beyond frameworks and commitments towards projects, capital, partnerships and real transactions.

A pipeline of African opportunities

CMAS will showcase a curated pipeline of 40+ African carbon projects and programmes, including investment-ready opportunities seeking capital and offtake partnerships.

The project portfolio spans nature-based solutions, carbon removals, regenerative agriculture, waste management, blue carbon and carbon technology, with projects presented through case studies, showcases, deal rooms and technology demonstrations.

Read the latest CMAS update: *Beyond the carbon credit: Who sets the terms for Africa's carbon markets?* - **Read the press release**.

For NBI members, CMAS offers an opportunity to:

- Connect with policymakers, investors, buyers and project developers
- Understand where capital is flowing and what buyers are looking for
- Explore investment-ready African carbon projects
- Gain practical insight into Article 6, authorisations and transactions
- Engage with developments shaping the future of Africa's carbon markets
- Build connections across the continent's growing carbon market ecosystem

Be part of the conversations, connections and opportunities shaping Africa's carbon markets.
